### ABOUT THIS BOOK

"One can reliably interpret tarot cards when one adheres to their images and symbols. Readymade recipes of

interpretation will not always be correct; often, they even disguise the glimpse into the actual symbolism. On the other hand, symbols are multifaceted and ambiguous; thus, it is not always easy to remember the overview or to situation, the current book presents a welcome remedy: For every one of the 78 tarot cards respectively, the ten most important symbols will be concisely described with their most important aspects."

## 10 Rules for This Book

Tarot is not a devil's toy and the Thoth Tarot makes this especially clear in a beautiful way!

- In the cards of Aleister Crowley and Lady Frieda Harris there is even more unknown that we can discover together. (We hope for letters from readers!)
- In our day jobs, we work in the publishing industry and cannot give as many lectures or seminars as we would like. With this book we are seeking to close this gap.

- Only prejudices survive about many cards. We would like to encourage people to look more closely at the meanings of the cards and to form their own opinion. What is printed on the label
- doesn't always tell the (whole) truth! That is true for most of the subtitles of the Thoth Tarot, and it applies to many areas of life.

The beauty, the content, and the human experiences that are revealed within them go far above and beyond templates of meaning such

as "success" or "failure." We would like to make that apparent. And rarely is a tarot better suited to such an endeavor than this one.

■ Tarot has often helped us in our everyday lives to look more closely and to better

understand meanings that can conceal themselves behind "only good" or "only bad" experiences. We want

to pass this on.

Around 1750, there was the f i r s t esoteric-symbolic **interpretation** of tarot cards. The notion that classical esotericism or occultism is "natural allies" with tarot cards only pertained to the nineteenth century, and only partly. The

nineteenth century was the heyday of classical occultism. Many small groups, mostly separate from each other, submersed themselves in the symbolism of tarot. Divination with cards of all kinds also flourished in the nineteenth century.

New today, and likewise self-evident, is the large number of ways to practice tarot and examine the card layouts. There are films, operas, and novels with and about tarot cards. modern tarot meanings. Everyone can make a picture for themselves (p. 24 and p. 76) and can begin to interpret on their own.

example 09/03/1968 amounts to 9 + 3 + 1 + 9 + 6 + 8 = 36. Settle the sum at a number between 1 and 21,

corresponding the personality card. (One recognizes major cards by the fact that the word "trump" is on them.) For example, if the sum = 19, the corresponding personality card is *XIX* — The Sun. When the computed sum amounts to 22, so pertains

so it corresponds to the

major card from your deck,

to the twenty-second major card—that is the Fool with the digit 0—as the corresponding personality card. If the sum of the digits is 23 or higher, as in the previous example, you need to find the sum again. For example, as a further sum, 36 yields 3 + 6 = 9; the large card with the same digit is now the corresponding personality card, in this example *IX* — *The Hermit*.

#### The character card. If the sum of your birthday is a number over 9, find the sum one more time and obtain the character card (for example: the personality card is 14, then we use the sum 5, and corresponding is card V — The Hierophant, the

character card, or the core).

smaller than 10, personality cards and character cards fall together. Then one can extrapolate vice versa and use the card from the major arcana with the same sum as a complement. Example: The personality card is VII — *The Chariot.* Then *VII* — *The Chariot* is also

already the character card.

In this case,

both complements to the personality card.

For many interpreters, *the* Fool is not only a beginning card; it is also the twenty-second great card, therefore

*the* card of wholeness and great accomplishment. A card now yields the difference between your personality card and the Fool (For example: Your personality card is the 14. **Develop the Theme of** the Card.

Every card has its own theme: a large marker in your life, such

as birth, marriage, or death; an example/archetype, such as *Justice*, the Fool, o r the Hermit; notable characters, like the court

These themes are *not* random, but are also not to be captured in one single subtitle. It applies it piece by piece in order to open up and understand. The most important key here is the knowledge of the four

elements (p. 24).

Use the hints in this book with every card under the heading "Basic Meaning." If needed, keep your own "tarot book," in which you note your insights of the cards. This is not about the concrete statement of a card, but about the overview; which markers, archetypes, and elements tarot

#### Numbers.

Naturally, numbers can have a symbolic meaning.

For example, numbers such as "4711" or "1968" or "9/11" are connected to specific histories.

And: The number 1 can

stand for singularity, but also for unity, simplicity, loneliness, and all other ideas that are related to the word "one." The number 2 can be found in ideas such as doubts or divisiveness; one shouldn't forget the supplement and reinforcement of the number 2: "Two is better than one," "Birds of a feather flock together," and "One can run on two legs," etc. Many numbers yield plays on words, for example the number 7 and

the word seven (with the

sieve seven) or 8 and

fitting phrases that express

awareness! Therefore, numbers do not possess universally valid, established meanings. When a book of tarot meaning says: "The crisisridden character of 5 is shown in this picture because...", the author foists his view of the card (that it deals with crises) onto the number 5. This in itself, however, can do

attention,

nothing and certainly is not subscribed to the theme of "crisis."

Only the value of a

function is reliable for tarot interpretation, for example 2 + 3 = 5. Consequently, these are exciting exercises for advanced tarot practitioners.<sup>2</sup>

Blind Spots AreGateways to NewProspects.

If, to the best of your abilities, you can see a card as only positive or only negative, then you know that you have discovered a blind spot in your perspective. Or if you have the impression that the artist of a particular card has misrepresented the meaning, then there is evidence of such a blind spot in your perspective.

Look at Yourself in the Face.

A possible problem of the Thoth Tarot exists in the fact that almost all of the human figures are depicted as faceless sketches. The face is a symbol of the identity. A faceless figure indicates not only a loss of face, but also a loss of identity. When someone already has problems looking at themselves in the face and knowing who

they are, then tarot cards with more faces can be potentially more helpful.

On the other hand, the relative facelessness can be

Represent Evolved Personalities.

We find a rapid access independent to interpretation if we

occupy ourselves with the four suits (refer to p. 24). And if we conceive of the court cards (queen, knight, prince, and princess<sup>3</sup>) as

personalities, we can bring these four elements closer to ourselves. Each court card represents an ideal type, a person, like a majesty who masterfully knows how to handle the corresponding element.

Ten of Wands warns against an underestimation obstacles and of exaggerated effort; it total encourages commitment and very figuratively, to arrange big purposes.

## Allow Time for You to See, without Immediately Evaluating. This necessary impartiality

can be best practiced with the Card of the Day. Although we would prefer a quick, clear answer to our current question—and precisely because this is so —it is helpful if we muster the patience and first just

look at, without evaluating,

what the chosen tarot card is saying to us. This is, incidentally,

perhaps the most important distinction between novices and professionals in tarot: The novice thinks the card theydrawis most

important. The professional knows that it is at least just as important how one sees the card that was drawn! The more we enter into the picture, maybe even taking the stance of the figure in the picture, or playing through the different perspectives and so forth, the more productive and also unexpected the ultimate solution is that the cards provide to us.

Work with Subjective and Objective Levels.
The Swiss psychologist C.

G. Jung developed these terms for dream interpretation. Viewed from the objective level, the figures and scenes in a dream (or here in a tarot image) stand for other people and external experiences. Viewed from the subjective level, the same figures and scenes are now mirror images and facets of the own person

and inner experiences.A fight or dispute in a

dream or in a tarot card can serve as the processing—or also the preparation—for an actual fight with another concrete person. However, the same dream or tarot card can also indicate an inner conflict.

inner conflict.

Whether the subjective level or the objective level is more prominent varies

from time to time. When in doubt, consider both possibilities.

Pars Pro Toto (The Part

Stands for the Whole).

The pictures and their details represent (positive)

and negative) meanings that together are unanimously exemplary of the *whole* card. Alone, a theme such as the root system in the cups cards

already speaks volumes. Through the comparison of the individual cards, we determine that the Four of Cups is the only card in which the (psychological) roots are completely covered. Also, the Six of *Cups* express more about the depths of feelings than any other cups card, because it is only in this card that an end to the

stalks and stems cannot be seen below.

There are few types of

tarot in the world that are so brilliantly and consistently composed as the cards of the Thoth. It invites you to investigate. Everything is perceptible in

Everything is perceptible in these pictures (one needs no secret knowledge!).

Recognize and Classify Associations. There has been

"Interpretation Literature" about tarot cards for a good two hundred years. Today, a few general standards have been established, the most important being the relationship of the four

can relate to very different subjects, for example in the image of the *Seven of Cups*: "The poor Professor Dumbledore...(in the sixth book of Harry Potter) must

the images colorful. However, only with personal associations is

there the risk that we turn tarot interpretation in circles; we often repeat what we already know. Therefore it is important to know and to separate both levels of interpretation:

personal associations and interpretation standards. Thus, new views often arise in everyday life. It can be seen in the

examples that Seven of Cups has something to do with the ability to sort out

and to fight for it like a noble knight.

It Is about Symbolism: **But It Is Always (also)** 

## about Your Own Life! 📻 Especially in his last

years, the great psychologist C. G. Jung was vehemently committed to the "symbolic life." Like

all famous depth psychologists, Jung was convinced that we only consciousness when we connect our thinking and actions to our dreams, visions, and heart's desires. The life with symbols with the "fables, myths, dreams," as Erich Fromm named it—provides the best connection of inner and outer life. Certainly C. G. Jung

the

of

holy

experience

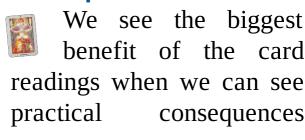

strength

foresaw (although did not mention it anywhere) that a "symbolic life" can also produce something negative: namely, a life as *if!* A life in rites, formulas, and writings can also be a "symbolic life," a parallel world below or on the level of the living, lived life.

To separate the wheat from the chaff, it is essential at every card reading to bring the interpretation to the real personal wishes and fears and then to take the next steps.

An Interpretation Is
First Concluded When It
has Practical
Consequences.

We see the biggest

from our own knowledge. We recognize whether an interpretation is correct for personal meaning from practical experiences. The central theme is that of *The Way of the Wishes:* This way arises and will be pursued when we:

understand and fulfill meaningful wishes

realize and break loose from meaningless wishes

take seriously and make provisions for valid fears

relinquish invalid fears.

As long as you continue this way, you use your own way to handle tarot or any other kind of psychology or fringe science. And vice

versa, even a rich tarot practice or an extensive knowledge of symbols stays

worthless in the personal sense, when that central theme, the abolition of personal wishes and fears, is missing.

The Magic of the Present Moment.

We experience the magic

through cartomancy: As the magic of the eyes, as the magic of the games with opinions and perspectives. And secondly as the magic of time, as working with the quality of time, with the magic of the moments (also of the eyes, the moment in the Universe

card; refer to point 5, p.

70). To savor this magic, it

of the moment doubly

is good to separate every card reading from previous judgments. We should of course take our knowledge with us and take it into account; however, we should give every card and layout the chance to consider it openly and in an unbiased way, as if it were our first tarot card ever.
